

IDENTITY SECURITY

• IAM AUTOMATION

• AGENTIC WORKFLOWS

• IDENTITY OPERATIONS

• LEGACY APP COVERAGE

AI-powered identity operations that close the gap between buying an IAM platform and actually running it.

ABOUT WAY SECURITY

Way Security is an AI-powered identity operations platform that deploys and runs enterprise IAM programs. Rather than replacing the identity platforms an organization already owns, it operationalizes them: AI agents execute application onboarding, policy rollout and remediation across the identity stack - under human oversight - including the legacy and custom applications that stall most IAM projects.

The platform already runs identity operations for enterprises across the United States and Europe, including Fortune 500 companies, healthcare organizations and financial institutions.

Most identity programs do not fail at purchase. They fail in the long tail of deployment and operations, where implementation and ongoing services can cost several times the software itself. Way Security removes that drag, so identity programs reach full coverage.

THE PROBLEM

IAM platforms are bought with big ambitions and then stall - integrations drag, legacy apps resist, and the program never reaches full coverage.

HOW WAY SECURITY SOLVES IT

Way Security automates the rollout and operations with AI-driven workflows, so identity programs finish.

CAPABILITIES

AI-driven IAM automation

Automates the deployment and day-to-day operation of identity platforms, replacing months of manual integration and configuration work.

Legacy & custom app coverage

Connects the applications that stall most IAM programs: homegrown systems and legacy software without modern connectors.

Agentic identity workflows

AI agents execute application onboarding, policy rollout and remediation tasks across the identity stack - with humans approving the plan.

Works with your existing stack

Nothing gets ripped out. Way Security operationalizes the IAM investments an organization has already made.

QUICK FACTS

FOUNDED: 2025 (out of stealth July 2026) LEADERSHIP: Yossi Barishev (CEO), Yonatan Rosenberg (CTO)
FUNDING: \$20M seed - Insight Partners & Glilot Capital CATEGORY: Identity operations / IAM automation

WHO BUYS IT CISOs, IAM program owners, IT operations
